Hatco Glo-Ray® Max Watt Infrared Foodwarmers keep all hot foods at optimum serving temperatures longer. The pre-focused heat pattern directs heat from a tubular element to bathe the entire holding surface. Units are available with shatter-resistant incandescent lights that illuminate the warming area. All Max Watt models are shipped factory-assembled, with adjustable angle brackets (shipped loose), ready-to-install quickly and easily.

Standard features

- 25% greater wattage output than Glo-Ray high watt:
 - GRAM models vary from 450-4150 watts
 - GRAML models vary from 570 - 4870 watts
- Available in widths from 18" to 144" (457-3658 mm) in 6" (152 mm) increments
- Sturdy extruded aluminum housings eliminate sagging.
- Pre-focused heat maintains serving temperatures longer without continuing to cook the food
- Reinforced wire guard provides operator safety without affecting heat distribution
- Standard control includes a Toggle Element Control Switch and Indicator Light (and separate Toggle Light Control Switch on Lighted models) in a Remote Control Enclosure
- Heavy-duty insulation minimizes heat loss
- Shatter-resistant incandescent lights (standard on GRAML models) enhance product display while safeguarding food products from bulb breakage (optional halogen bulb)
- Additional reflector styles and lower wattage elements also available, please consult factory for more information
- Includes Angle Brackets and Attached or Remote Control Enclosure

▲ 120 volt models require additional switches and tandem (end-to-end) elements or the use of Electronic infinite control (RMB).

◊ 120 volt models not available with Built-in Controls.

▼ 120 volt models require additional switches and tandem (end-to-end) elements.

▶ Models contain tandem (end-to-end) elements that may be individually controlled.

◇ Available with Remote Control Enclosure (RMB) only.

* Shipping weight includes packaging and does not include RMB.

§ GRAML models that have multiple voltages listed, such as 120/208 or 120/240, have multiple internal circuits. For example a 120/208 volt unit utilizes 120 volts for light circuit and 208 volts for the heat circuit(s). Consult the Electrical Diagram supplied with the unit for specific information. Light-equipped strip heaters that require a circuit breaker 20 amps or larger must be installed with a remote control enclosure containing a fuse rated at 20 amps or less for the light circuit.
